Brent R. Sumsion, Project Coordinator  
W.W. Clyde & Co.  
P. O. Box 865  
Springville, Utah 84663

In November and December 2002, W.W. Clyde was authorized under two mineral material contracts to remove 12,000 cubic yards of rip rap from a disposal site at T. 28 S., R. 3 W., section 34, SLM, Piute County, Utah, in the vicinity of the Piute Reservoir Dam. The two contracts expired on March 26, 2003. The disposal site was jointly inspected by staff of the Utah Division of Oil, Gas, and Mining and the Bureau of Land Management on November 15, 2006. The agencies concurred that the site on public land is reclaimed. Therefore, the case files for the mineral material contracts, UTU-79891 and UTU-79892, are closed.

A corporate surety bond, 103937967, with the Travelers Casualty and Surety Company of America in the amount of \$16,000.00 was posted with the Bureau of Land Management to ensure compliance with the terms of the subject contracts and reclamation of disturbed public lands. This bond is released from further liability.

If you have any questions, please contact Michael Jackson at (435) 896-1522.

Sincerely,

Wayne A. Wetzel  
Associate Field Manager
